

HP Envy 700-030qe CPU Fan Replacement

Replacing the fan on the HP Envy 700-030qe computer.

Written By: Jessica Resta

INTRODUCTION

This guide will show you the process of replacing the CPU fan on the HP Envy 700-030qe desktop computer.

TOOLS:

- [Anti-Static Wrist Strap](#) (1)
 - [Phillips #000 Screwdriver](#) (1)
-

Step 1 — CPU Fan

- Make sure that you are wearing your anti-static wristband. This will prevent damaging any internal parts with any built up static electricity.
- Unscrew the 10.5mm screw on the left of the desktop using your hand.
- ⓘ If it is too tight you may use a torx-head screwdriver or a flat-head screwdriver.

Step 2

- Next, remove the side panel by sliding it towards the back of the desktop and pulling up, as shown.

Step 3

- Remove the four 120mm Phillips #000 head, 5 mm screws holding the fan.

Step 4

- Carefully pull up and disconnect the fan's power cable.

Step 5

- Remove the fan by pulling up carefully.

To reassemble your device, follow these instructions in reverse order.
